Disappointing Receipts and Decrease in Visible Supply Lose Advance in Wheat.

GOOD SPECULATIVE BUSINESS IN CORN

Corn Unchanged to an Eighth of Cent Higher, Pork and Lard Unchanged-Ribs Are Up Ten Cents.

CHICAGO, Aug. 29.-Expectations of increased receipts tomorrow, together with a decrease in the visible supply, where the opposite had been predicted, caused almost the complete loss of an early advance in wheat today. Compared with Saturday night September left off 1-524c higher and December gained \463-8c. Corn is unchanged to 1-8c up. Oats unchanged. Pork and lard are unchanged and ribs rose 71/2

Wheat experienced a strong start because of disappointingly small receipts in the of disappointingly small receipts in Liv- Hgillo.

northwest and higher quotations from Liv- Hgillo.

CANTALOUPE—Home grown, per crate, pected in view of the advance on this side

Minneapolis and Duluth received 582 cars, compared with 939 on the previous Monday and 542 on the corresponding day of last year. The visible supply statement showed 77,000 bu. increase for the week, making the total 5,927,000 bu. A year ago the visible decreased 1,256,000 bu, and the total then was 15,473,000 bu. As a decrease had been expected in today's statement the bullishness of the market received a partial extinguisher. People who needed September wheat and had found considerable difficulty in buying were now emplied to have their wants supplied without shouting for the wheat, sellers being compelled to take a turn at the shouting. The estimate that the carloads of wheat at Chicago for toy morrow's inspection would number 406 was another blow to the bulls in the market. That in addition to the disappointment about the visible supply caused September to drop for a time all its early advance. December was relatively firmer and did not decline more than 1/20, while September was losing ic. December was much more largely dealt in than September and has most pronouncedly become the active trading funess of the market received a partial extindealt in than September and haz most pronouncedly become the active trading future. September was difficult to buy when
wanted and hard to sell when that was considered desirable. The total for the day at
all primary western markets amounted to
1.281,000 bu., compared with 1.412,000 bu. a
year ago. The clearances from Atlantic
ports for the day were smaller than of late,
the total in wheat and flour being 191,000
bu. September opened unchanged to ½c
higher at from 84c to 64½c, but before much
could be bought it was up to 84½c and from
that worked gradually upward to 55c. It
declined again to 64c, touching 53 7-8286c
for a moment and was 61 1-82644c at the
bell tap. December started 1-823-8c up at
614,262c, advanced to 62 8-8262½c and reacted to 61 7-8262c, which was its final trading price.

A good speculative business was done in
corn and in the main the market was
strong. The hone of contention was the

A good speculative business was done in corn and in the main the market was strong. The bone of contention was the condition of the growing crop, upon which subject there was a wide difference of opinion. The wheat market influenced corn when it was advanced and correspondingly depressed the latter when it was declining. September opened unchanged to 1-8c lower at 29.7-8@30c, advanced to 30.1-8@30i/4c and closed at 30.1-8c, sellers.

There was little done in oats, except changing from September to December was made even and September to December was made even and September to December was made even and September and May changed at from 2c to 2.1-8c premium for the latter month. September opened 1-8c lower at 19%c, rose to 20.1-8c and reacted to 19.7-8c at the close.

Moderate buying by English houses held provisions firm. Lard and fibs were comparatively stronger than pork. September holdings have been transferred or sold and the trade was no longer under the influence of operations by people who had no use for provisions on delivery day, now close at hand. September pork opened 2½c down at 83.82½ and sold up to \$8.85.

September lard started unchanged to 2½c lower at \$5.1065.12½, declined to \$5.07½65.100, then firmed up to \$5.17 at the close. September ribs began 2½@5c off at \$5.20 and improved to \$5.32½, the closing figure.

Estimated receipts for tomorrow: Wheat, \$405 cars; corn. 1,080 cars; pats, 655 cars; hogs, 14,000 head. Estimated receipts for tomorrow: Wheat, 405 cars; corn. 1,080 cars; pats, 655 cars; hogs, 14,000 head. The leading futures ranged as follows:

Prices of Stocks Break Sharply and Are Depressed Throughout. NEW YORK, Aug. 29.-Prices of stocks broke sharply today and showed depression throughout. The first rally showed considerable vigor, but later in the day the recuperative powers of the market became feebler and the close was barely steady at slightly above the lowest. Net losses ranged from 1 to 2 per cent in leading stocks.

There was a growing disposition to realize profits both by professional traders and by outside holders. The latter was shown by the steady stream of selling orders that came from the commission houses today. Professional traders quite generally took the side of the market and bears sold with growing confidence, the dependent today. Professional traders quite generally took the side of the market and bears sold with growing confidence, the demand at the close being light, even at the substantial reduction of prices. There is evidently a large growth of the powerful trading element which has lightened its holding of stocks and is anxious for lower prices to buy back again. There was palpable manipulation at the opening to fix a low level for prices. In some of the leading stocks the opening was about the lowest of the day. Others held quite firmly for the rest of the day's session, but eventually yielded to the persistent demonstration of the bears in other stocks. Buying for London account was a distinctive factor in the firmness in a number of international favorites, notably Southern preferred. Erle first preferred, Denver preferred and Norfolk & Western preferred. There was a steady absorption of stocks at the decline, which was specially marked in Burlington and St. Paul. This seemed to be the result of buying orders below the level of the market for traders' account as well as from commission houses. The same thing was evident in the Pacific and other stocks here and there throughout the list.

The tendency to sell was undoubtedly due to the prospects of tight money. The minimum sale for call loans was held at 2 per cent and 3 per cent was paid in some cases. In sympathy with the money market and with the increasing supply of grain and cotton bills, actual rates for sterling exchange declined 4c on the pound. The London money market was marked up a sharp fraction today and there was buying of gold in the open market there said to be for shipment to New York. No engagement was announced, however, in Wall be for shipment to New York. No engagement was announced, however, in Wall gagement was announced, however, in Wall street. Other departments of the money market showed hardening tendency, but there was no tendency in the quotations. Aside from the conditions in the money market there was nothing to account for the day's decline.

The higher rates for money caused a depression in the bond market even more than in stocks. Some of the speculatives that have been recent favorites showed marked reaction and heaviness predominated in all issues. Total sales, \$3,725.000.

United States 5s declined 1-8 per cent in the bid prices and on actual transaction. The

Beers mines fluctuated sharply, became firm, suffered a serious relapse and recovered at the close of the market. Three per cent rentes, 1037 for. Exchange on London, 25c 4c for checks American securities opened weak. Later prices became firmer, but trading was inactive and the market closed dull and featureless.

LONDON, Aug. 29.—The caur's peace note cheered the operators on the Stock Exchange today, though they were occupied with the settlement and fears of dearer money. New York operations checked operations in securities, which afterwards improved. Gold is quoted at Buenos Ayres today at 159.50.

MADRID, Aug. 29.—Gold was quoted at 64. Shanish is closed at 65.

BERLIN, Aug. 29.—Operations on the bourse today were favorably impressed by the suggestion of the car looking to a general disarmoment and business opened with an upward tendency. Later business became quiet on realizations, in connection with settlement, and there was a reaction, especially in coal and iron shares.

LONDON, Aug. 29.—The amount of bullion taken into the Bank of England on balance today was £164,000. Bar gold is quoted at 71s 1044d.

New York Dry Goods Market.

NEW YORK, Aug. 29.—Opening conditions in dry goods are on the whole satisfactory. There is a fair proportion of buyers in town. Mail orders continue in fairly heavy proportion to provide an outlet for widely diversified classes of goods. There are still many road salesmen at work. But many of the orders received are based on natural and routine stuff filling needs. Dress goods are fully as quiet as men's wear goods and in some quarters they are quieter. Print cloths show the best results in cotton goods. There is continued curtailment at Fail River this week. The aggregate curtailment will probably be equal to or more than that of last week's sales cut a large silce off stocks in manufacturers' hands. There is no advance in quotations, but they are undoubtedly steadier. It is almost impossible to obtain any better prices. New York Dry Goods Market.

NEW YORK, Aug. 29.—SUGAR—Raw, strong and held firm; fair refining, 3 15-16c; centrifugal, 4 5-16c. Only about ten to fifteen loads of cows and heifers were on sale, about all of them grassers, and the most of them none too good. The market on that kind of cattle did not show much change on account of the light offerings and it was not long until they were all picked up. It might be expected, however, that with anything like a liberal run of cow stuff the market would go off in the same proportion that grass steers have. go off in the same proportion that grass steers have.

Over half of all the cattle on sale were western feeders, over 109 loads being reported on sale. Choice or fancy feeders were reported steady, but out of all those on sale there were very few loads that would answer to that description. The general run of the feeding cattle sold about loc lower. The market was fairly active at the decline and a considerable proportion of the rattle on sale changed hands in good season. Considering the decline on beef and the number on sale, the market was by no means in bad condition. Representative sales:
